

Priya Raghunathan

Staff Site Reliability Engineer

priya.raghunathan@example.com | (555) 0142 | Atlanta, GA

SUMMARY

Staff SRE with 11 years running production infrastructure for high-traffic consumer platforms. Led reliability for a fleet of 160+ Kubernetes clusters across three regions. Comfortable owning on-call, incident command, and the unglamorous work of making postmortems change something.

EXPERIENCE

Staff Site Reliability Engineer, Northwind Logistics 2021 - present

- Operate Kubernetes at scale: 160+ clusters, multi-region, zero-downtime upgrades.
- Rebuilt the on-call rotation and cut pages per engineer per week from 14 to 3.
- Own Terraform modules used by 40 engineers; migrated 300+ resources to modules.
- Built SLO tooling on Prometheus and Grafana; error budgets now gate releases.

Senior Infrastructure Engineer, Calder Systems 2017 - 2021

- Ran the AWS estate: EKS, RDS, S3, IAM. Reduced spend 31% without cutting capacity.
- Wrote the incident response runbook and ran incident command for Sev1s.
- Introduced Docker-based CI, cutting build times from 22 minutes to 6.

Infrastructure Engineer, Hartwell Payments 2015 - 2017

- Linux systems administration, Ansible configuration management, Nagios monitoring.

SKILLS

Kubernetes, Docker, Terraform, AWS, Linux, Go, Python, Bash
Prometheus, Grafana, Datadog, PagerDuty, ArgoCD, Helm
CI/CD, GitOps, incident response, on-call, capacity planning, SRE practices
PostgreSQL, Redis, Kafka

EDUCATION

B.S. Computer Engineering, Georgia Institute of Technology, 2015
